

Day / Week No.	Title	Extra Description	Trainer
Module 1	Actionable Usage of Excel	Live Class 1: Introduction to Data Analytics Component of a Data Analyst Tools needed to be a Data Analyst Why Data Analytics? Scope of a Data Analyst Introduction to Excel interface Cell formatting: Copy, Cut, and Paste in Excel Cell Referencing (Relative vs Absolute Referencing) Formatting Shortcuts Flash Fill Tutorial Live Class 2: Advanced Excel Basics Conditional Formatting Data Structure: Sorting and Filtering Customizing header and footer Using Print Area Fixing number of pages to be printed of whole sheet Printing both sides Printing in center of the page Using Freezing Panes Splitting windows	Masud
Module 2	Excel Formula in Business Integration	Live Class 1 Logical Functions FILTER IF() Condition and Expression of Logical Test Using IF with AND & OR AI In Excel Text Function (Join & Split) Carefulness of VLOOKUP Function Live Class 2 Using GROUPBY SUMIF, COUNTIF Using SUMIFS, COUNTIFS, INDEX and MATCH function, Using AVERAGEIFS AVERAGEIF	Masud
Module 3	Complex Data Management : What If Analysis & Excel Pivot	Live Class 1 What-if Analysis Goal Seek Data mapping to prepare a PivotTable Various types of report layout (report in compact form, report in tabular form) Customizing subtotal at any row label data and subtotal category Changing PivotTable data source Live Class 2 What-if Analysis Scenario Manager Inserting a calculated field and calculated item Grouping/ungrouping data by year, quarter, month, day Sorting and filtering techniques in PivotTable data Slicer in PivotTable (creating, changing, and formatting) Make your PivotTable dynamic using slicer Pivotby Function	Masud
Module 4	Power Pivot, Dax & Data Modelling	Live Class 1 Understanding table structure Understanding various relationships Understanding primary & foreign key Manage data model from multiple file Dynamic Model Live Class 2 Using Measure in PowerPivot Preparing dashboard using PowerPivot Manage data from multiple folders Using few DAX functions in PowerPivot	Masud

Day / Week No.	Title	Extra Description	Trainer
Module 5	Data Cleaning Wizards: Power Query	Live Class 1 What Is Power Query PowerQuery Understanding table structure Merge & Append Table Live Class 2 Creating data model Exploring PowerPivot Unpivot Technique	Masud
Module 6	Business Dashboard	Live Class 1 Business Dashboard Power Query Power Pivot Dax Live Class 2 Business Dashboard Power Query Power Pivot Dax	Masud
Module 7	Exam Week 1	Assignment মডিউল ১ থেকে মডিউল ৬ পর্যন্ত যা যা আলোচনা হয়েছে, তার উপর ভিত্তি করে থাকবে একটি বড়সড় অ্যাসাইনমেন্ট। এটি আপনাকে আপনার শেখা বিষয়গুলো পুনর্বিবেচনা এবং বাস্তব জীবনের চ্যালেঞ্জ মোকাবিলার প্রস্তুতি নিতে সাহায্য করবে। Test মডিউল ১ থেকে মডিউল ৬ পর্যন্ত শেখা বিষয়গুলোর উপর ভিত্তি করে একটি লাইভ টেস্ট হবে। এই টেস্টে আপনার দক্ষতা ঝালাই করার সুযোগ থাকবে।	Masud
Module 8	SQL for Data Modeling and Visualization	Live Class 1: Introduction to SQL and Data Models Understanding SQL and Data Models Basic SQL Syntax and Structure SELECT Statement: Retrieving Data from Tables Filtering Data with WHERE Clause Sorting Data with ORDER BY Clause Live Class 2: Data Models and Basic SQL Queries Understanding Data Models Using SQL for Data Extraction Aggregating Data for Dashboards Introduction to SQL Joins Simple Grouping and Aggregation	
Module 9	Advanced SQL Queries for Data Analysis and Dashboards	Live Class 1: Working with Joins and Subqueries in SQL Joins in SQL Subqueries: Introduction and Usage Using Subqueries for Filtering Data Working with Multiple Tables Performance Considerations Live Class 2: Aggregating and Visualizing Data for Dashboards Advanced SQL Aggregation Nested Queries for Complex Data Analysis Data Aggregation for Dashboards Using Subqueries and Nested Queries for Data Modeling Query Optimization Techniques	

Day / Week No.	Title	Extra Description	Trainer
Module 10	Power BI Essentials: Setup, Data Transformation & Cleaning	Live Class 1 Overview of Power BI and its ecosystem Installing and setting up Power BI Desktop Power BI interface basics: panes, ribbons, and views Overview of data sources compatible with Power BI Hands-on Activity: Connecting to a simple dataset and importing data Live Class 2 Introduction to Power Query Editor Data transformation basics: filtering, merging, and appending tables Data cleaning techniques: handling missing values, removing duplicates Data Modeling Basic data shaping: pivoting and unpivoting data Hands-on Activity: Using Power Query to clean and transform raw data	Masud
Module 11	Data Visualization and DAX Basics	Live Class 1 Overview of visualization types: bar, line, pie charts, tables, etc. Choosing the right visualization for data types Formatting visuals: color, labels, titles, and interactions Introduction to slicers, filters, and drill-throughs Hands-on Activity: Building a simple dashboard with basic visuals Live Class 2 Basics of DAX and its purpose in Power BI Creating calculated columns and measures Common functions: SUM, AVERAGE, COUNT, and basic conditional logic Using DAX for aggregations and simple calculations Hands-on Activity: Creating measures and calculated columns in a sample dataset	Masud
Module 12	Power BI Report Publishing and Sharing	Live Class 1 Creating and formatting a complete Power BI report Introduction to Power BI Service: publishing and sharing reports Setting up report access and security basics Live Class 2 Basics of creating dashboards in Power BI Service Hands-on Activity: Publishing a report to Power BI Service and sharing it	Masud
Module 13	Exam Week 2	Assignment মডিউল ৮ থেকে মডিউল ১১ পর্যন্ত যা যা আলোচনা হয়েছে, তার উপর ভিত্তি করে থাকবে একটি বড়সড় অ্যাসাইনমেন্ট। এটি আপনাকে আপনার শেখা বিষয়গুলো পুনর্বিবেচনা এবং বাস্তব জীবনের চ্যালেঞ্জ মোকাবিলার প্রস্তুতি নিতে সাহায্য করবে। Test মডিউল ৮ থেকে মডিউল ১১ পর্যন্ত শেখা বিষয়গুলোর উপর ভিত্তি করে একটি লাইভ টেস্ট হবে। এই টেস্টে আপনার দক্ষতা ঝালাই করার সুযোগ থাকবে।	Masud
